

## Project Overview

As of July 27, 2010

## Rich Street Bridge Replacement

**Description and Benefits:** Rich Street Bridge will replace the earthen-filled concrete arch Town Street Bridge, built in 1917, with a modern, concrete rib-arch bridge composed of five spans, 10-foot sidewalks and three traffic lanes. The project includes Second Street between Rich and Mound as well as Washington Blvd. between Town and Rich.

The work includes renewing the 100+ year-old water and combined sewer lines; new water main, storm, sewer rehabilitation and electricity; new signal interconnect; two-way traffic conversion on Second Street, including resurfacing, striping, signs, street lights, combination street/signal poles at

intersections, granite curbs, brick sidewalks with "green" bio-retention planter cells, landscaping, planters, metal benches, trash cans, bike routes with racks, etc. Washington Blvd. work includes resurfacing, striping, signs, street lights, curbs and sidewalks.

The new bridge will have a veterans' theme and provide a vital connection between the Franklinton community and downtown Columbus. The bridge will be built on a new alignment to connect Rich Street on the east to Town Street on the west side of the Scioto River. The project will include rebuilding West Bank Park.

### Schedule:

Construction started March 2010, with completion set for August 2011.

### Status:

Contractor is working on foundations and waterline on Second Street.

### Costs:

Design - \$5.7 million; Construction - \$21,871,269.

### Funding:

Local revenues (including design)	\$9.14 million
Ohio Department of Transportation	\$17,000,000
Ohio Dept. of Trans. inspection	\$1,700,000
Federal Earmark	\$2,760,000
Franklin County	\$250,000
Ohio Public Works Commission	\$6,000,000
Federal stimulus dollars	\$2,000,000
